

### Magic: One SMART horse

The book is about a horse named Magic and his owner Jody. They move to Florida and meet another horse named Mr. K. Magic has an eye infection when he is six years old. They have to remove his eyes and he is blind. He is still a great horse. Mr. K helps Magic find his way around the pen. Mr. K helps him find food and water. At the end Magic and Mr. K become friends.

My favorite part of the book is when Magic gets caught on the barbed wire and gets a scar. It is an exciting and scary part. It is sad that this happens to Magic but it shows he cannot be taken down easily.

This book teaches me that sometimes you have to help others and at other times you need help too.

I would recommend this book to my family and friends because some people have problems but they should all be treated well.
